

# Ramp and turntable for large appliances

## Description

Custom made ramp and lazy susan for maintenance shop. The washing machine or dryer can be rolled up the ramp to a better working height for appliance repair. Lazy susan allows the appliance to be rotated for easier worker access. Safety stops are used on the turntable.

*Worker can stand or sit while repairing the appliance instead of having to kneel, squat, or bend the back as would be necessary if the dryer was not raised.*
